Summary

Software engineer with nearly four years of experience delivering B2B SaaS platforms, travel products, and internal business systems. Specialized in React and Next.js, with solid full-stack experience across backend APIs, databases, authentication, and infrastructure. Comfortable turning complex requirements into reliable, production-ready solutions, modernizing legacy applications, mentoring junior developers, and owning features from initial planning through deployment.

Experience

Rezerv (Codigo) — Frontend Developer Sep 2025 — Present

React Next.js Tailwind MUI Recoil TypeScript

- Build referral, payment, payroll, transaction, and reporting experiences across B2B business and customer portals.
- Clarify requirements with product managers during sprint refinement and collaborate closely with backend engineers throughout implementation.
- Integrate complex APIs and manage shared state across large React and Next.js workflows.
- Improve maintainability through reusable UI patterns, clearer component boundaries, and consistent state-management practices.
- Contribute to AI-assisted workflows using prompt design and structured outputs while keeping final technical decisions and reviews within the engineering team.

rezerv.co

Oway Travel — React Developer Mar 2025 — Sep 2025

React Next.js SASS Zustand SEO

- Helped modernize Oway Travel's legacy web platform into a cleaner and more maintainable React-based experience.
- Created the initial Next.js structure for a new loyalty points system despite having no previous production experience with Next.js.
- Improved search visibility and page indexing through SEO work and Prerender.io integration.
- Integrated local payment providers, including AYA Pay and KBZPay.
- Simplified complex Redux state by introducing Zustand for more maintainable future development.
- Guided a junior developer and worked with product managers and backend engineers during sprint delivery.

owaytravel.com

UMG Myanmar — Senior Web Developer

Jul 2024 — Mar 2025

React Node AWS Nginx MySQL Alibaba Linux

- Led the delivery and maintenance of internal systems for employee training, attendance, meeting rooms, meeting minutes, reporting, and performance reviews.
- Reduced repeated Odoo API calls to roughly one-third through Redis caching and direct API integration, improving overall loading performance.
- Gathered technical requirements directly from internal users and translated them into practical system improvements.
- Guided two junior and intern developers by assigning work, reviewing implementations, and sharing development practices.
- Collaborated with mobile developers and QA engineers to deliver and maintain production features.
- Managed private Linux servers and application deployments using Nginx, Apache, and PM2.

umgmyanmar.com

UMG Myanmar — Junior Web Developer

Jun 2023 — Jun 2024

Laravel Vue Nuxt Node MongoDB

- Built and maintained full-stack features for internal business systems with guidance from a senior developer.
- Worked across frontend interfaces, backend APIs, databases, third-party integrations, and production deployments.
- Contributed to TeaTalk, an internal social platform, including purchasing workflows and Dinger payment integration.
- Developed practical experience in debugging production issues, communicating with users, and maintaining existing applications.

umgmyanmar.com

ExBrain Co., Ltd. — Intern Web Developer

Feb 2023 — Jun 2023

Vue Tailwind Laravel

- Learned Vue.js while contributing to real production tasks and existing application code.
- Worked with senior developers through code reviews, feedback, and collaborative implementation.
- Built an understanding of team workflows, coding discipline, debugging, and maintaining production software.

Selected Projects

Rezerv — B2B SaaS Platform

A business management platform for service-based companies, covering booking, membership, referrals, payments, payroll, sales transactions, and reporting. I build customer and business portal experiences, integrate complex APIs, manage shared application state, and collaborate with product managers and backend engineers to turn operational requirements into reliable features.

React · Next.js · TypeScript · Tailwind · MUI · Recoil

rezerv.co

Oway Travel — Online Travel Booking Platform

A customer-facing travel platform for searching and purchasing flights and other travel services in Myanmar. I helped modernize its legacy web experience, established the Next.js structure for a new loyalty points system, improved SEO with Prerender.io, integrated AYA Pay and KBZPay, and simplified selected Redux workflows using Zustand.

React · Next.js · TypeScript · Redux · Zustand · SASS · Prerender.io

[🔗 owaytravel.com](#)

TIS — Employee Training & Performance System

An internal platform for managing employee classes, enrolment, attendance, reviews, and performance calculations. I worked across the full stack, reduced repeated Odoo API calls to roughly one-third through Redis caching and direct integration, and guided junior developers while coordinating with users, mobile developers, and QA engineers.

Vue.js · Laravel · Redis · Odoo APIs · SQL · Nginx · Docker

[🔒 Private internal system](#)

MOM — Meeting Minutes & Room Management System

An internal system for checking meeting-room availability, organizing meetings, recording minutes, and producing monthly reports. I developed and maintained the full-stack application, integrated real-time data from Odoo, delivered features based on employee feedback, and managed its private-server deployment and ongoing maintenance.

Vue.js · Laravel · Tailwind · Odoo APIs · SQL · Nginx

[🔒 Private internal system](#)

TeaTalk — Social Platform

A company social platform with Facebook-style content and interaction features alongside purchasing and payment workflows. I led two junior developers, implemented payment calculations and Dinger integration for the ICE management system, contributed across React and Node.js, and managed production deployment while keeping delivery on schedule.

Nuxt.js · Node.js · TypeScript · MySQL · MongoDB · Dinger · PM2 · Nginx · AWS

Education

University of the People

Apr 2025 — Aug 2026

Bachelor's Degree · GPA 3.5

European International University

Jun 2024 — Nov 2026

Program submitted · awaiting result

Skills & Tools

Languages	TypeScript, JavaScript, Python, PHP
Frontend	React, Next.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, MUI, ShadcnUi
State & Data	Zustand, Redux, Recoil, React Query
Backend	Node.js, Express, Laravel, REST APIs
Databases	PostgreSQL, MySQL, Redis

Infrastructure	Linux, Nginx, Docker, GitHub Actions, AWS
Additional	SEO, payment integrations, Scrum, prompt engineering, structured AI outputs
AI Tools	Claude, Cursor, Codex
